In the table below, indicate the specific contributions made by each author (list the authors' initials followed by their surnames, e.g., Y.L. Chang) to the submitted manuscript. A check mark (✓) must appear against the name of each author at least once in each of the three categories below.

Acknowledgments

All persons who have made substantial contributions to the work reported in the manuscript (e.g., technical help, writing and editing assistance, general support), but who do not meet the criteria for authorship, are named in the Acknowledgments and have given us their written permission to be named. If we have not included an Acknowledgments in our manuscript, then that indicates that we have not received substantial contributions from non-authors.

CONFLICTS OF INTEREST

A conflict of interest occurs when an individual's objectivity is potentially compromised by a desire for financial gain, prominence, professional advancement or a successful outcome. *GMIT* Editors strive to ensure that what is published in the Journal is as balanced, objective and evidence-based as possible. Since it can be difficult to distinguish between an actual conflict of interest and a perceived conflict of interest, the Journal requires authors to disclose all and any potential conflicts of interest.

Did you or your affiliation receive any financial support or service from a third party related to the subject matter or materials discussed in the manuscript? No Yes

Is there any relevant conflict of interest? No Yes

Is there any condition/circumstance that may present a potential conflict of interest? No Yes

If you answered yes to any of the above questions, please elaborate the nature of the conflict in the space below.

This *Authorship & Conflicts of Interest Statement* is signed by the corresponding author on behalf of all the authors listed in the manuscript. The corresponding author certifies that all the information contained in this statement is true, correct and agreed on by all the listed authors.
